Measure with Paper Tiles

Use equal units. Start at the edge; keep tiles straight, touching and not overlapping.

Our unit: _____ (for example, paper tiles)

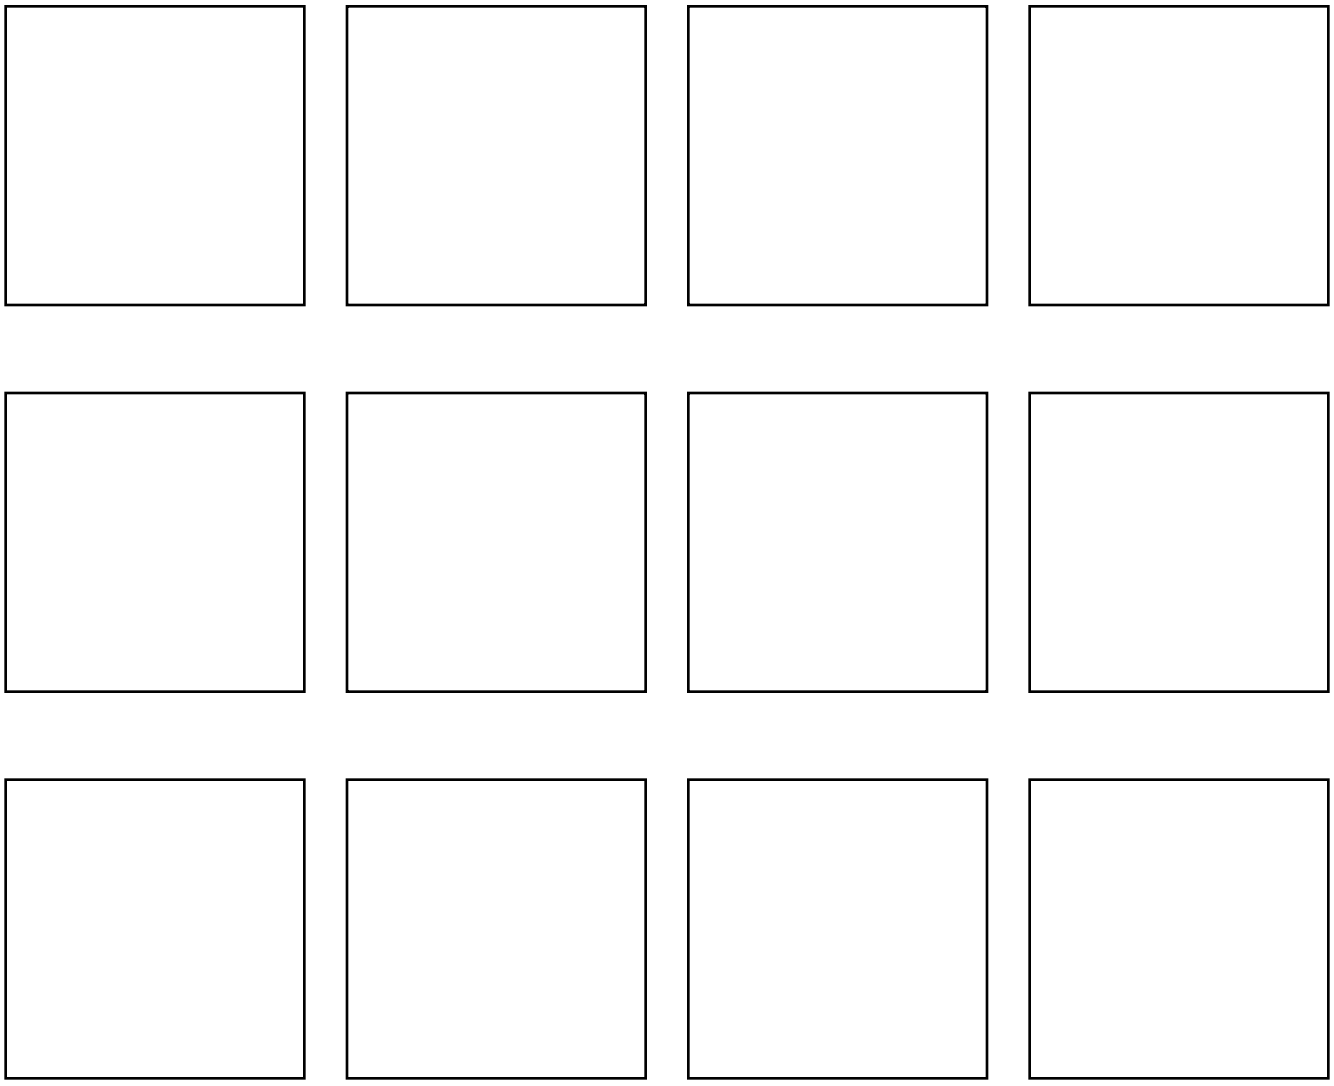

Object / drawing	My guess	Measured result	Note / drawing

Include the unit: "4 tiles" or "between 4 and 5 tiles". A guess is optional.

Compare objects using the same tile size. These tiles are not centimeter units.

Equal Paper Tiles

An adult cuts along the borders. All twelve squares are the same size.

Print every tile page at the same scale. Letter: actual size; A4: fit to page.

Choose short objects first. Supervise loose pieces and store the set in an envelope.
